Product Description

This accessory has the same functionality as item 106-00100 but with the added connectors for using the AT2000 CPK automatic cable tying tool in fully automated applications – robotics and PLCs, for example. In addition to routing power to the tool, this accessory collects the production data and information that can then be analyzed on a PC to fine-tune processes. An onboard USB port is used to offload data to USB drive. The Power Pack CPK with Control Box also has the socket necessary to add an optional foot pedal.
