

Specification Sheet

Part Number: FDES-E

Fiber Distribution Enclosure, Splice Only, White, 1/pkg

Article Number

904-00995

Type

FDES-E

Color

White (WH)

Features & Benefits

- Suitable as a building entry point or floor distributor unit, creating an indoor breakout and distribution point.
- Removable cover and hinged tray provide easy access during installation and fiber protection during use.
- High-quality molding with rounded edges to prevent potential damage to unprotected fiber.

Quantity Per

EA

Product Description

The Fiber Distribution Splice Enclosure is used as a building entry point or floor distributor to splice and route indoor fibers. These enclosures provide a central demarcation point to distribute optical data signals within a specific floor or zone of a larger installation, or as an indoor entry point into smaller buildings and homes. The slim, two-layer enclosure has multiple cable entry points to accommodate different mounting and routing options including mid-span, in-line or end-point configurations. The hinged splice tray supports up to 18 fusion splices and covers the fiber storage area located in the base of the enclosure.

Short Description

Fiber Distribution Enclosure, Splice Only, White, 1/pkg

Global Part Name

FDES-E-ABS-WH

Port Count

18
