

Specification Sheet

Part Number: FFE-1LC

Fiber Façade Enclosure, 10–15 mm, LC Simplex style, No Adapters Installed, PC, Black

Article Number

904-01149

Type

FFE-1LC

Color

Black (BK)

Features & Benefits

- Separation of cable entry, splice and patch areas provides ease of installation and protection of fibers during initial installation and future provisioning.
- The UV protected, IP55 dust and water ingress and IK09 impact-resistant enclosure protects connections to ensure a long installation life.
- Cable pass-thru feature minimizes splices and maintains performance of unused fibers.

Quantity Per

EA

Product Description

The Fiber Façade Enclosure is an outdoor fiber demarcation solution engineered to accommodate multiple fiber drops to the home, apartment or small office building. The FFE accepts higher fiber count outdoor cables, allowing SC or LC pigtails to be spliced while the remaining fiber cable continues for subsequent connections. The integrated splice tray folds and locks to protect the fibers, making subscriber adapters accessible for pre-terminated outdoor fiber drop cable connections. The FFE can be mounted aerially or at ground level, to a pole or wall to deliver up to eight drop cable connections to single family homes, apartment buildings or multiple suite office facilities.

Short Description

Fiber Façade Enclosure, 10–15 mm, LC Simplex style, No Adapters Installed, PC, Black
