Submersible Pump Cable

600 Volt
75°C
3 Conductor w/ Ground

Construction:
- Flat panel

Category Conductor Description:
- Annealed bare solid or stranded copper conductors

Category Insulation Description:
- Polyvinyl Chloride (PVC)

Applications:
- For use within well casing supplying power to the submersible pump
- Maximum conductor operating temperatures of -40°C to 75°C in circuits not exceeding 600 volts

Standards:
- UL Listed per UL83 Type THW construction as deep well submersible pump cable
Note: The data shown are approximate and subject to standard industry and manufacturer tolerances.
