Hospital	Accreditation Decision	Effective Date	Last Full Survey Date	Last On-Site Survey Date
	Preliminary Denial of Accreditation	2/1/2019	1/31/2019	2/21/2019

The following information provides a general description of the areas in which performance issues were found. Each of these areas typically has many specific requirements. The area is listed if one or more of the specific requirements were determined to require improvement.

- Building and fire protection features are designed and maintained to minimize the effects of fire, smoke, and heat.
- Entries in the medical record are authenticated.
- Hospital leaders allocate needed resources for the infection prevention and control program.
- Identify patients at risk for suicide. Note: This requirement applies only to psychiatric hospitals and patients being treated for emotional or behavioral disorders in general hospitals.
- Staff are competent to perform their responsibilities.
- Staff participate in ongoing education and training.
- The governing body is ultimately accountable for the safety and quality of care, treatment, and services.
- The hospital analyzes identified environment of care issues.
- The hospital collects information to monitor conditions in the environment.
- The hospital complies with law and regulation.
- The hospital conducts fire drills.
- The hospital defines and verifies staff qualifications.
- The hospital engages in planning activities prior to developing its written Emergency Operations Plan. Note: An emergency is an unexpected or sudden event that significantly disrupts the organization's ability to provide care, or the environment of care itself, or that results in a sudden, significantly changed or increased demand for the organization's services. Emergencies can be either human-made or natural (such as an electrical system failure or a tornado), or a combination of both, and they exist on a continuum of severity. A disaster is a type of emergency that, due to its complexity, scope, or duration, threatens the organization's capabilities and requires outside assistance to sustain patient care, safety, or security functions.
- The hospital establishes and maintains a safe, functional environment. Note: The environment is

constructed, arranged, and maintained to foster patient safety, provide facilities for diagnosis and treatment, and provide for special services appropriate to the needs of the community.

- The hospital evaluates the effectiveness of its Emergency Operations Plan.
- The hospital has a reliable emergency electrical power source.
- The hospital has an infection prevention and control plan.
- The hospital has an organizationwide, integrated patient safety program within its performance improvement activities.
- The hospital has policies and procedures that guide and support patient care, treatment, and services.
- The hospital honors the patient's right to give or withhold informed consent.
- The hospital identifies risks for acquiring and transmitting infections.
- The hospital initiates restraint or seclusion based on an individual order.
- The hospital inspects, tests, and maintains emergency power systems. Note: This standard does not require hospitals to have the types of emergency power equipment discussed below. However, if these types of equipment exist within the building, then the following maintenance, testing, and inspection requirements apply.
- The hospital inspects, tests, and maintains medical gas and vacuum systems. Note: This standard does not require hospitals to have the medical gas and vacuum systems discussed below. However, if a hospital has these types of systems, then the following inspection, testing, and maintenance requirements apply.
- The hospital maintains fire safety equipment and fire safety building features. Note: This standard does not require hospitals to have the types of fire safety equipment and building features described below. However, if these types of equipment or features exist within the building, then the following maintenance, testing, and inspection requirements apply.
- The hospital manages risks associated with its utility systems.
- The hospital manages risks related to hazardous materials and waste.
- The hospital manages safety and security risks.
- The hospital provides and maintains building features to protect individuals from the hazards of fire and smoke.
- The hospital provides and maintains systems for extinguishing fires.
- The hospital provides care, treatment, services, and an environment that pose no risk of an "Immediate Threat to Health or Safety," also known as "Immediate Threat to Life" or ITL situation.
- The hospital reduces the risk of infections associated with medical equipment, devices, and supplies.
- Use at least two patient identifiers when providing care, treatment, and services.

Sites

- Single Specialty Practitioner (Outpatient)

Symbol Key

-  This organization achieved the best possible results
-  This organization's performance is above the target range/value
-  This organization's performance is similar to the target range/value
-  This organization's performance is below the target range/value
-  This measure is not applicable for this organization
-  Not displayed

Measures Footnote Key

1. The measure or measure set was not reported.
2. The measure set does not have an overall result.
3. The number is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The measure results are not statistically valid.
7. The measure results are based on a sample of patients.
8. The number of months with measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

The Joint Commission only reports measures endorsed by the [National Quality Forum](#).

* This information can also be viewed at [Hospital Compare](#).

** Indicates per 1000 hours of patient care.

*** The measure was not in effect for this quarter.

---- Null value or data not displayed.
