Special Quality Awards

Due to our commitment to accurate data reporting, The Joint Commission is suspending the practice of updating Special Quality Awards until further notice

- **2014** Silver Plus Get With The Guidelines - Stroke

Organization Commentary

Ms. Deve Vetter, System Associate Vice President, Patient Safety Officer

Norton Hospital supports the Joint Commission in its efforts to make hospital quality data available to the public. We offer these brief comments on each of the major sections of the report: - Special Awards: We were just named to The Top 100 Hospitals Performance Improvement Leaders, a national ranking of hospitals. - Accreditation: We are fully accredited. - National Patient Safety Goals: We meet all these important guidelines for protecting our patients. - Heart Attack Care: We meet the overall standard. We are proud of our very low mortality rate, which this report shows is about half of what you would expect given the complex patients that come to Norton Hospital. - Pneumonia Care: We meet the overall standard. Our own analysis shows that our pneumococcal vaccination rate has improved, and is now well above the national average. - One final comment: Despite our strong performance in this report, we emphasize that these measures represent only some of the components of quality patient care. Reports such as this should not be used in isolation. The final decision in selecting a hospital still rests with the individual patient and his or her physician.
